

### **PCR (reaction) cleanup**

1. Mix 5 times PB to the volume of the reaction (e.g. 250  $\mu$ l for 50  $\mu$ l PCR reaction)
2. Apply on a spin column and spin for 1 minute, 15,000 g or more
3. Add 750  $\mu$ l PE and spin for 1 minute, 15,000 g or more
4. Dry spin column by centrifugation for 2 minute, 15,000 g or more
5. Elute with water or EB
